

BIB TAG APPLICATION GUIDE

Use this guide to properly apply disposable tags to your race bibs.

1. Flip the disposable tag so the backside is facing upward and locate the corner with a cut in the backing paper.
2. Fold the cut corner forward and peel the backing paper off the corner.
3. Peel the remaining backing paper from the body of the disposable tag.

4. Turn the disposable tag over so the sticky side is down and center over the backside of a race bib. Gently press the tag onto the race bib beginning with the center and smoothing outward, and apply a solid even pressure along the full perimeter.

Do not pull adhesive or copper wire from the back of the bib.
