- FSLS Line Numbers
- LRC Checking of tag strings
- Added functions to Command port
 - Patch Update
 - Show Versions
- Clock Sync Improvements
- Improved Dashboard Integration

Dashboard-Elite

The screenshot shows the Delta v2.5.1.0 Elite reader dashboard. At the top, there are tabs for 'Elite Rdr' and 'Lite Rdr'. The main title is 'Elite reader' with the version 'Delta v2.5.1.0'. Below this, there is a dropdown menu showing the IP address '10.19.1.101' and a 'Disconnect' button. To the right is the 'Onboard Logging' section, which includes a 'Rec ON' button, a download icon, a refresh icon, a trash icon, and a progress indicator showing '5.1M/1600M'. Below the logging section are two main panels: 'Statistics / Status' and 'Reader Time'. The 'Statistics / Status' panel contains a 'View tags' button, 'Unique tags 0', and 'Up time 00:17:51' with a 'Reset' button. The 'Reader Time' panel shows 'Computer time' and 'Reader time' both as '7/22/2014 3:55:42 PM', along with a 'Set time' button and an unchecked checkbox.
